- Height handle out : 850 mm
- Width at the handles : 310 mm
- Diameter of the magnet : 110 mm
- Weight : 3,5 kg

# Technical sheet

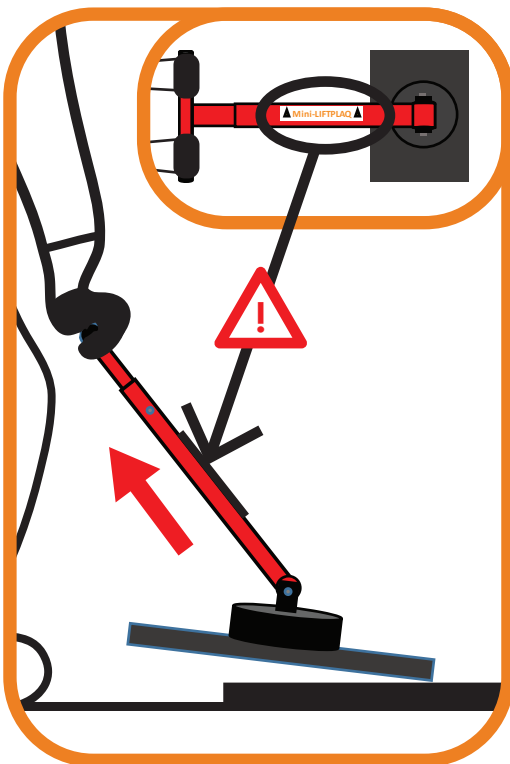

Easy and quick to use

## USE OF THE TOOL

The piston integrated in the magnet makes it possible to unhook the magnet from the plate without forcing :

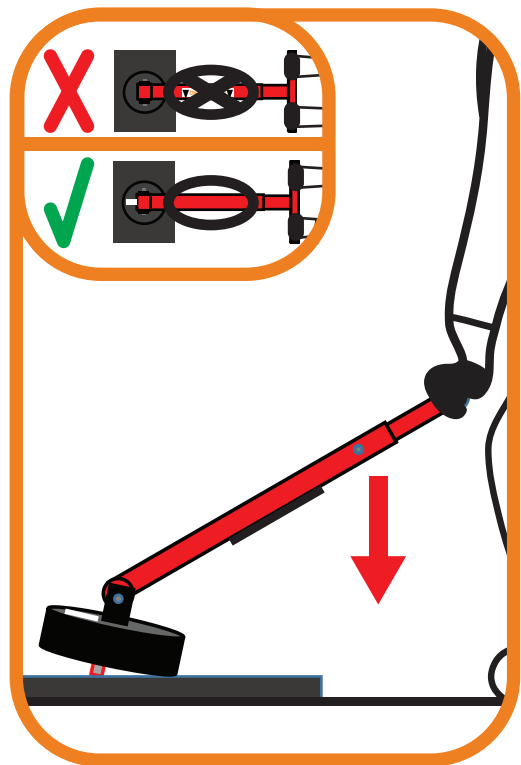

### Step 1 : LIFTING AND MOVE

Put the magnet on the cover and move the cover.  
For handling, make sure that the "MINI LIFTPLAQ" label is visible from above.

### Step 2 : UNHOOK THE MAGNET

Lower the tool in the opposite direction.  
The piston pulls out and unhooks the magnet from the plate.  
For handling, make sure that the label is not visible from above.
